# Regenerative Urban Design and Ecosystem Biomimicry

**Maibritt Pedersen Zari**

*Series: Routledge Research in Sustainable Urbanism*

This book examines and defines the field of biomimicry for sustainable design and goes on to translate ecological knowledge into practical methodologies for architectural and urban design that can proactively respond to climate change and biodiversity loss. These methods are tested and exemplified through a series of case studies of existing cities in a variety of climates. *Regenerative Urban Design and Ecosystem Services* will be of great interest to students and researchers of biology, design and environmental studies, as well as those interested in the interdisciplinary study of sustainability.
